Professional Experience

Registered Practical Nurse December 23, 2021 – Present

Michael Garron Hospital, Toronto, ON

- Provided direct care at offsite vaccination clinic
- Participated in pre-vaccine eligibility, vaccine administration, and post-vaccine patient assessments
- Worked collaboratively with other clinical and non-clinical staff within an interdisciplinary team
- Demonstrated competency in a fast-paced environment
- Identified one's limitations and consulted others when necessary
- Concisely documented assessments and interactions with the clients as needed in the client's record to communicate with the interdisciplinary team
- Followed policies and procedures set by MGH for client and staff safety

Registered Practical Nurse August 30, 2021 – Present

Kensington Gardens Long-term Care, Toronto, ON

- Identified patient's needs and monitored health conditions based on objective signs, symptoms, and subjective data as verbalized by the resident
- Applied therapeutic communication techniques that are deemed appropriate
- Maintained client confidentiality while sharing information with the inter-professional healthcare team and obtained consent before providing nursing care

- Administered scheduled medications and performed wound care and dressing changes appropriately
- Performed sterile procedures, including catheterization, dressing change, wound care, and subcutaneous access initiation using appropriate aseptic technique
- Identified one's limitations in nursing practice and consult others when necessary
- Concisely documented results in SBAR format in the patient's chart and communicated to the following staff

Remote Patient Safety Monitor November 5, 2020 – Present

Mount Sinai Hospital, Toronto, ON

- Assisted nurses in keeping patients safe and maintaining their medical devices while in the facility by utilizing remote video monitoring
- Engaged in conversation to attempt to verbally redirect patients who are at high risk of falls and/or tend to pull their medical devices
- Maintained a continuous and accurate flow of patient information with the oncoming staff, including significant adverse behavior

Student Nurse May 12, 2018 – July 27, 2018

Malton Village Long Term Care Centre (Butterfly Home Area), Brampton, ON

- Carried out procedures as ordered by physicians and assisted with patients' ADL and treatment while maintaining respect regarding clients' diversity
- Monitored potential side effects, adverse reactions, and pain after medications were administered and procedures done
- Respected client's privacy and dignity while interacting and providing nursing care
- Engaged patients in activities and conversations and assisted with mobility
- Concisely documented results of assessments, interventions, and evaluations during the shift in the patient's chart and communicated to the following staff any changes that happened during the shift

Personal Support Worker March 19, 2016 – November 13, 2020

Carecor Health Services, Toronto, ON

- Provided floor duty and observational care services in health care facilities within Toronto
- Assisted patients with personal hygiene, such as but not limited to oral, perineal, and skin care
- Assisted nurses in providing nursing care that needed two-person assistant or more, such as but not limited to turning and/or repositioning patients in bed and transferring
- Recognized changes in a patient's behavior and health condition, which were reported to the primary healthcare provider

Registered Nurse January 1- December 31, 2013

Baguio General Hospital & Medical Center, Baguio City, Philippines

- Completed patient hospital admissions and provided nursing education before hospital discharge
- Administered scheduled IV fluids and medications, including antibiotics and narcotics, safely
- Performed sterile procedures, including catheterization, dressing change, wound care, and IV access initiation using appropriate aseptic technique
